①

Seleziona i gradi di apertura e la
forza del Chiudiporta desiderati.
Usare lo schema per contrassegnare
i fori per il corpo e per la base
del braccio regolabile.

Select the requested opening angle and
strength of the Door Closer.
Use the template to mark the holes for body
and for the base of the adjustable arm.

→

②

Fissare il corpo del chiudiporta e la base del
braccio regolabile ai fori contrassegnati.
Connettere il braccio non regolabile al corpo
tramite la vite fornita.

Screw the Door Closer's body and the base of the adjustable
arm to the marked holes.
Connect the nonadjustable arm to the body with the pro-
vided screw.

③

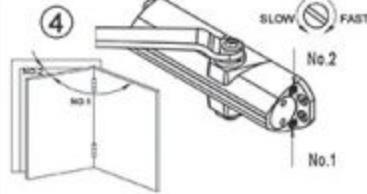

BRACCIO REGOLABILE
ADJUSTABLE ARM
BRACCIO NON REGOLABILE
ARM NOT ADJUSTABLE

Regolare la lunghezza del braccio regolabile in
modo che sia perpendicolare (90°) alla porta,
quando connesso al braccio non regolabile.
Poi connettere il braccio regolabile al braccio non
regolabile tramite la vite fornita.

→

④

Regolare la velocità di chiusura tramite la vite di regolazione 1.
Regolare la velocità nell'ultimo tratto di chiusura tramite la vite
di regolazione 2.

Adjust the closing speed by the regulating screw 1.
Adjust the speed in the last closing section by the regulating
screw 2.
